

Entegra and Ecolab have joined together to create a laundry program exclusively for entegra HealthTrust Program Participants.

Entegra's Ecolab Laundry Program includes products, equipment, installation, training, service and support.

Products

- Ecolab offers a full line of products for a wide variety of soil, water and linen conditions
- Ecolab wash formulas are set-up for specific linen and soil classifications
- Gentle detergents & ultra softeners, formulated to protect/condition linens
- 5 gallon containers and large drums (15 & 55 GL) for any sized operation
- Ancillary products available including the Stain Blaster Product Line that can reduce linen replacement costs by reclaiming linen that would otherwise be discarded.

Equipment

- Dispensing equipment loaned at no-charge while purchasing Ecolab products
- State-of-the-art Dispensing Options
 - Microprocessor controlled pump system delivers up to 6 different products - for use on medium-sized washer extractors.
 - Optional flush manifold is available.
 - Programmable for up to 16 unique linen classifications.
 - Individual formula load counts help to verify correct procedures and control product usage.

Installation

- Ecolab will install and maintain the Ecolab dispensing equipment at no charge to the customer.
- Representatives work with the laundry manager to schedule the installation to minimize laundry down time.
- Ecolab has the ability to re-program laundry machines to ensure excellent results along with optimizing energy and water consumption and to program the Ecolab laundry dispensers to meet your facility's specific needs.

Training

- Training available for laundry managers and employees to ensure proper procedures are followed.
- Operating charts available for displaying in your facility to ensure proper wash formulas and drying times
- Training available upon request for chemical safety and Material Safety Data Sheet review
- Ecolab can make recommendations for training based on their observations of your laundry operation to ensure optimal efficiency at the lowest total cost.

Service and Support

- Regular service reviews of your entire operation to maintain the highest level of productivity and performance
- 24 hour access through the largest customer service/support group in the industry
- Advanced Technical Service lab that evaluates and recommends solutions for difficult soils, new linen types, changing water conditions and other problems that may arise in your operation.
- A Research, Development and Engineering team dedicated to developing state-of-the-art products, dispensing systems and tools.

To get started on entegra's Ecolab Laundry Program, please contact Mike Holland, entegra's National Account Manager for Ecolab, at 240.629.9431 or e-mail at michael.holland@ecolab.com.
